Dr. Bo and Dr. Sue

Dreaming of a beautiful smile? Make an appointment with the dynamic husband and wife team, Drs. Bo and Susan Paunovic, D.D.S. for advanced dentistry at its very best and with a gentle touch. Their offices in Newburgh and Fishkill offer an extensive range of procedures in family and cosmetic dentistry including full-mouth reconstruction and smile makeovers which utilize teeth whitening, porcelain veneers, crowns and implants.

“We do full mouth rehabilitation taking into account both function and cosmetics—you can’t have one without the other,” says Dr. Bo Paunovic. “It’s critical to know how the teeth occlude. My lab and I collaborate to make everything work in harmony. For the best possible results, the joints, the muscles and nerves must work together with the teeth.” In making dentures, one of Dr. Bo’s specialties, he applies the same principles of balancing beauty and functionality. “It makes the difference between poor fitting dentures and great fitting dentures,” he says.

Dr. Susan Paunovic sees a lot of children and loves working with them. This growing following is a testament to the patience, care and attention she gives to the younger set. To alleviate any anxiety that young patients may have about going to the dentist, Dr. Susan Paunovic offers sedation dentistry and a licensed anesthesiologist is on staff. Of course, sedation dentistry is available for adults as well. “Phobia of dentists shouldn’t

keep patients from achieving the cosmetic result they’ve always desired, alleviate their dental pain or keep them from getting proper dental care,” says Dr. Susan Paunovic. Sedation dentistry can deal with all those issues, usually in just one sitting.

Recently added to the doctors’ advanced technology is FDA-approved Velscope, a light source that helps detect oral cancer. With this new instrument, a light is shined into the mouth to detect any abnormal growth, even below the skin, and can take a picture of it. It’s a safe and painless method of detecting oral cancer the naked eye can’t see.

Drs. Bo and Susan Paunovic provide their patients not only with state-of-the-art technology but with a commitment to remain current in their training and education. Both doctors attended the prestigious Columbia University School of Dental and Oral Surgery. Ongoing study of dentistry has been a priority for them. “It’s not just about dental school,” says Dr. Bo Paunovic, “It’s post graduate training and experience that’s important.” They further their knowledge through continuing education programs taken alongside the most prominent doctors in the world.

You deserve the smile of your dreams. To feel good about yourself and get the best dental care in the Hudson Valley, contact Drs. Bo and Susan Paunovic at [SmilesThatDazzle.com](http://SmilesThatDazzle.com)
